

LEUPHANA

UNIVERSITÄT LÜNEBURG

At Leuphana University Lüneburg, Institute for Sustainable and Environmental Chemistry, Chair for Sustainable Chemistry and Resources, a vacancy is open for a

Scientist (m/f) in Chemoinformatics/Environmental Informatics

The salary will be according to EG 13 of the German public service labor agreement (EG 13 TV-L).

The position is temporary, either three years half-time for a Ph.D. student, or 1.5 years fulltime for a postdoc.

Prolongation may be possible.

Job Description:

- Research in (chemo)informatics in the field of environmental chemistry (focus on biodegradation and ecotoxicology would be advantageous)
- Presentation of results at national and international conferences
- Publishing in international journals
- Assistance in acquisition of third-party projects

Your Qualifications:

- Master's degree in chemistry/environmental sciences, specialization in (chemo)informatics
- Experience/interest in chemoinformatics, in particular in QSAR, and in environmental chemistry and (eco)toxicology
- Master's degree in applied informatics, specialization or serious interest in one of the fields mentioned above or equivalent experience and skills
- Working knowledge of German
- Teamwork and organizational ability, high motivation

The Leuphana University is an equal opportunity employer. Applications from women are particularly encouraged. Candidates with disabilities possessing equivalent qualifications will be given preference within the framework of legal requirements.

For more information please contact Dr Christoph Rücker (ruecker@leuphana.de) or Professor Dr Klaus Kümmerer (klaus.kuemmerer@leuphana.de).

Send your application with the usual documents before December 1, 2011 to:
